

Certification Program Implementation Note

Document Name	NFC Logical Link Control Protocol (LLCP) Technical Specification
Document Version & Date	Version 1.0, 2009-12-11
Implementation Note Effective Date	2011-04-01
Implementation Note Sequence Number	CPIN-001

Issue Description

The *NFC LLCP 1.0 Technical Specification* mandates, in a specific case (Section 6.2.4 MAC Link Deactivation), behavior that is contradictory to that specified in the *NFC Digital Protocol 1.0 Technical Specification*.

Corrective Action

Work to correct the NFC LLCP 1.0 Technical Specification is currently underway. The *NFC Forum Digital Protocol 1.0 Technical Specification* remains unchanged.

Implementer Action

Implementers are recommended to give priority to the requirements defined in the *Digital Protocol 1.0 Technical Specifications* as outlined below:

Digital Protocol 1.0 Technical Specifications, Sections 14.12.4.2, 14.12.4.6, and 14.12.4.8: DEP_REQ commands

Take precedence over

LLCP 1.0 Technical Specifications Section 6.2.4: MAC Link Deactivation (the MAC performing the Target role SHALL, on request of the local LLC, stop responding to ISO/IEC 18092 DEP_REQ commands until the peer device sends the Deselect Request (DSL_REQ) and confirm link deactivation back to the local LLC).

Compliance Effect

Compliance with the recommendation above (Implementer Action) shall constitute compliance with the *NFC LLCP 1.0 Technical Specification* for purposes of asserting compliance with *NFC LLCP 1.0 Technical Specification*.
